

Eco Product Highlights

Birla Jingwei Fibres Co Ltd

China

www.birlacellulose.com**Birla Cellulose**
Fibres from nature

With over 50 years of experience in manufacturing world-class cellulosic fibres, Birla's expertise ensures that their customers get the most advanced products in the industry. At the core of this dynamism is a much larger motive – of ingraining eco-friendliness into every fibre of human life – making all of their applications greener, purer and safer for both people and the planet.

The company sets goals for environmental responsibility, aiming to minimise environmental impact, prioritise waste recycling, and invest in cleaner technologies.

They will exhibit their **Birla Cellulose, Birla Viscose, Birla Modal, Birla Spunshades** and **Birla Excel** at Yarn Expo Spring 2019.

Duniatex

Indonesia

<https://www.duniatex.com/>

Duniatex is an integrated and world class textile company focuses on spinning, weaving, dyeing, finishing and knitting. Duniatex manages 20 plants in Central Java. Their major product is **regenerated yarn**.

At Yarn Expo Spring 2019, we will exhibit raw white single ring spun yarn.

Haiyan Haili Green Fiber Co.,Ltd.

China

<http://www.hlrefiber.com/>

Haiyan Haili Green Fiber Co.,Ltd produces POY and FDY from 100% Post-consumed PET bottles. To ensure stable higher quality filament, Haili sources control from the raw materials, completing industrial chain covering “bottles-flakes-yarn”. Through decades of actual operation, they have already mastered the core technology of recycle polyester yarn and have a strong and experienced team. Until now, the company has an annual output of 250,000 tons of filament grade PET flakes and 200,000 tons of polyester yarn.

Haiyan Haili Green Fiber Co.,Ltd will exhibit their recycled polyester yarn DTY, POY, FDY at Yarn Expo Spring 2019.

Perfect Spinning Co

Egypt (new!)

www.perfectspinning.com

Perfect Spinning is an environmentally-friendly producer and exporter of regenerated yarn. They specialise in the production of recycled open end yarn, using fabric scraps produced by the textile industry, in turn reducing CO2 emissions generated by incineration. They use a closed cycle air cleaning system, which ensures product quality and a clean work environment. Their yarn is made from recycled cotton and is available in a wide variety of colours, counts and blends.

At Yarn Expo Spring 2019, they will display a **regenerated yarn** from count Ne 3 till Ne 20, blended with a majority percentage of regenerated cotton & **100% Egyptian cotton open end**.

Zhejiang Jiaren New Materials Co., Ltd

China

<http://www.jiarenrecycle.com/en/index.php/welcome>

Zhejiang Jiaren New Materials Co., Ltd adopts the Eco Circle™ chemical cyclic regenerative system technology owned by Japanese Teijin Company, uses wasted polyester materials such as wasted garments and leftover materials as the raw materials for production, and make them into new polyester fibers with high quality, multi-functions, traceability and eternal cyclicality, through complete chemical decomposition. The final polyester fibers are widely used in high-end sports wear, business wear, school uniform, men's and women's fashions, home textiles, beddings, automobile inner decorative products and etc...

At Yarn Expo Spring 2019, **Zhejiang Jiaren New Materials Co., Ltd** will be showcasing their recycle polyester DTY FDY POY& differential polyester at the domestic hall.
