Visitors' experiences

"We come to Yarn Expo every year as a verticalised textile company. Because we manage the full supply chain – from sourcing fibres like cotton, polyester, nylon, and viscose, to weaving and knitting production in both Europe and China – our needs span a wide range of suppliers. The selection here is good, with all the major Chinese companies present. We can easily find everything we need, including sustainable fibres and yarns. As an industrial player, we're very satisfied overall. We also exhibit our fabrics at Intertextile, so we'll definitely continue to return."

Mr Marco Borio, General Manager, Edotex (Hangzhou) Co Ltd, Italy

The future of sustainable textile sourcing starts at Yarn Expo Spring 2027

Momentum is building for the upcoming edition of Asia's largest yarn and fibre trade fair, where industry leaders will converge to explore the next phase of textile sourcing, sustainability, and innovation. Following a strong last edition that brought together over 600 exhibitors and more than 25,000 visitors, the fair remains a powerful platform for business exchange, product discovery, and global market connection.

With sustainability at its core, Yarn Expo Spring will spotlight regenerative materials, traceable supply chains, and circular chemistry. From cutting-edge recycled fibres to low-impact dyeing technologies, the fair is set to reflect the industry's growing drive towards greater transparency and responsible production. Alongside this, the fair will spotlight the future of high-performance materials through advances in bio-synthetic spandex, cooling technologies, and AI-integrated smart textiles.

As a dynamic sourcing hub in Asia, the show offers industry players valuable opportunities to showcase innovation, strengthen their presence in the market, and support long-term business growth. Apply now to reserve your booth at Yarn Expo Spring 2027!

Functional fibre & yarn

Key takeaways from exhibitors

"We're a US textile-to-textile recycler turning polycotton waste into polyester chips and lyocell/viscose pulp, targeting downstream spinners. This is our first time exhibiting at Yarn Expo. It's a very good platform to enter the Chinese market. We're pleased with China's strong sustainability focus, with high T-to-T awareness, rapid recycling plant scale-ups, abundant bio-based solutions, and open business mindset. The fair's scale and key players make it ideal for connections."

Ms Kathleen Rademan, Vice President of Commercial Strategy, Circ Inc, United States

Product groups

Fibres:

- Natural (cotton, wool, silk & flax / ramie)
- Functional
- Sustainable
- Man-made (regenerated & synthetic)
- Specialty

Yarns:

- Natural & blended (cotton, wool, silk & linen / ramie)
- Functional
- Sustainable
- Man-made & blended (regenerated & synthetic)
- Elastic
- Fancy
- Specialty

A closer look at fibre trends and material innovation

China Fibres Fashion Trends Forum and Enterprise Product Launch

A key platform spotlighting China's evolving fibre fashion landscape, this session presents emerging innovations and seasonal directions shaping the market.

New Fibre New World – Textile Materials Innovation Forum

Focusing on the future of textile development, this forum brings together insights on advanced techniques, new materials, and sustainability practices driving more innovative and responsible material solutions.

China Fibres Fashion Trends Display Zone

Showcasing the versatility of modern fibre applications, the display zone features forward-looking innovations, including advanced polyester filaments and sustainable yarns designed for cross-industry use.

China Fibres Fashion Trends Show

This showcase presents a vibrant selection of eco-friendly yarn products, reflecting rising global demand for traceable and more sustainably produced textile materials.

See you at Yarn Expo Spring 2027

Date:

10 – 12 March 2027 (Wednesday – Friday)

Venue:

National Exhibition and Convention Center (Shanghai), China

Admission:

Free admission, trade visitors only. Persons under 18 will not be admitted.
